Hello,

I am a customer of Dominion Energy and installed solar panels at my residence in 2016 at [REDACTED] Charleston, SC [REDACTED]. The proposal by Dominion energy is a ridiculous overreach and would dramatically increase our energy bill simply because we chose to install solar panels. It doesn't align with how other power companies handle rooftop solar in South Carolina or in the rest of the county and penalizes South Carolinians for choosing to reduce their energy usage by installing solar panels.

I urge the Public Service Commission to support homeowners who have already chosen to install solar, or want to install solar in the future, and not allow Dominion Energy to stifle home solar with this proposal.

Nate Wofford
